

Morning everybody, we hope you are well and have managed to settle back into a routine after the holidays. Here are some ideas of activities that you can do this week. We would also love to see what books you have been sharing at home too.

Floating and sinking investigation:

-This is a great activity to do with the children and it can be done in a variety of ways. You could do it in the bath/sink/paddling pool/ bucket of water.

1. Can you collect a variety of different objects to test.
2. Test the objects and see which ones float and which ones sink.
3. Can you sort the objects into 2 different piles so we can see what you found out.

It would be great if you could draw a picture or have a go at using your phonics knowledge to label some of the objects.

Here is a video you may want to watch with your child
<https://m.youtube.com/watch?v=s2DTW0EMigk>

Maths What do you know about the number 11? Here is the link to a Numberblocks programme about 11. <https://www.youtube.com/watch?v=yvDFHohFfII> You might like to show us where the number 11 fits in the number system, consider before and after numbers, explore different ways of making 11, play hide and find with the number 11. You could have a go at writing equations making 11 or tell a story using the number 11.

There are also new White Rose maths challenges for this week on the school website in the children's area.

Phonics

Please go to the 'Phonics and Reading' section of the website and follow the link to some fabulous Phonics lessons that start daily today. There will be little activities for you to have a go at. We would like you to watch these and see how you get on.

Have a lovely week 😊
